

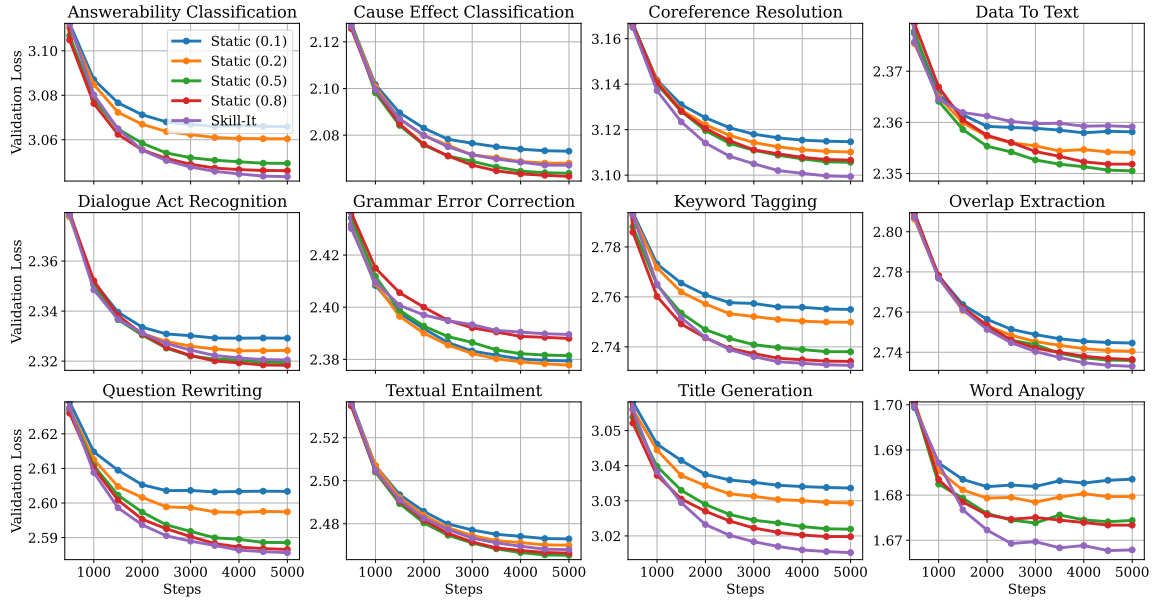

Figure 33: Comparison of SKILL-IT versus using static data selection with $\eta = 0.1, 0.2, 0.5, 0.8$ on the Natural Instructions out-of-domain experiment. SKILL-IT attains the lowest validation loss on 7 out of 12 evaluation skills, and an average loss of 2.540 compared to a range of 2.541-2.551 for static data selection.

attains the lowest validation loss on 7 out of 12 evaluation skills. It has an average loss of 2.540 compared to a range of 2.541-2.551 for static data selection.
